SHADRACK MUSA NZOWA

Cybersecurity & Digital Forensics Engineer

Email: snzowa5@gmail.com
Phone: +255 624 754 974
Location: Dodoma, Tanzania
LinkedIn: linkedin.com/in/shadrack-musa-232557342

PROFESSIONAL PROFILE

Cybersecurity and Digital Forensics Engineering student with practical experience in network security, vulnerability assessment, Linux administration, and enterprise infrastructure environments. Skilled in penetration testing tools, web application security testing, technical troubleshooting, and cybersecurity reporting. Experienced in working with Active Directory simulations, virtualized lab environments, and security-focused projects. Passionate about helping organizations strengthen their security posture through secure system design and modern cybersecurity practices.

EDUCATION

Bachelor's Degree in Cyber Security and Digital Forensics Engineering
University of Dodoma (UDOM) — Undergraduate

TECHNICAL SKILLS

- Vulnerability Assessment & Security Testing
- Network Security Configuration
- Linux Administration (Ubuntu & Kali)
- Windows & Windows Server Basics
- Enterprise Networking Concepts
- Cloud Concepts & Enterprise Systems
- Technical Support & Troubleshooting
- Technical Reporting & Documentation
- Communication & Presentation Skills

Tools: Kali Linux, Burp Suite, Nmap, Wireshark, SQLMap, Metasploit, Nessus, OpenVAS, Autopsy, FTK Imager

PROJECTS & PRACTICAL EXPERIENCE

Web Vulnerability Assessment & Security Testing
Performed vulnerability scanning and security analysis on web applications using Burp Suite, Nmap, SQLMap, and OpenVAS in controlled lab environments.

DHCP Spoofing & Network Security Analysis
Built isolated networking labs to study DHCP spoofing behavior, packet interception, and mitigation techniques using

Wireshark and Linux networking tools.

Operating System Booting & Troubleshooting
Installed, configured, and repaired Linux and Windows operating systems including boot troubleshooting, partition management, and service recovery.

Network Security Configuration
Configured secure networking environments including Linux services, firewall rules, local web services, and segmented virtual networks.

Enterprise Network Design & Architecture
Designed enterprise-style network layouts with routing concepts, subnetting, server segmentation, and secure communication architecture.

VoIP Communication Setup
Configured and tested VoIP communication environments using SIP-based softphones such as MicroSIP and Zoiper.

AI-Based WasteSort Scanning System
Developed a smart waste classification concept integrated with AI-based scanning logic for automated waste sorting and environmental management improvement.

EXPERIENCE

Cyber Security & Penetration Testing Practice
Freelance / Academic Labs — 2024 to Present

• Conducted vulnerability assessments and security testing in isolated lab environments.
• Performed network enumeration and traffic analysis using industry-standard tools.
• Created technical reports with findings and remediation recommendations.
• Practiced Linux administration, system troubleshooting, and service configuration.

CERTIFICATIONS

• Certified Red Team Analyst (CRTA) – CyberWarFare Labs
• Red Teaming Path – TryHackMe
• AI Security Path – TryHackMe
• CompTIA Pentest+ Path – TryHackMe
• Offensive Pentesting Path – TryHackMe
• SOC Level 1 Path – TryHackMe
• Jr Penetration Tester – TryHackMe
